

IRYNA MIKHEYENKA

SENIOR PRODUCT DESIGNER (UX/UI)

Product Designer with 6+ years of experience designing digital products for international markets across healthcare, AI, fintech, Web3, and consumer platforms. Specialized in complex user flows, product strategy, UX research, and scalable design systems for web and mobile applications. Experienced in 0→1 product development, cross-functional collaboration, and building intuitive user experiences for high-impact digital products.

EXPERIENCE

Senior Product Designer

Pink Elephant Group

Dec 2024 – Present | Remote

Projects: States of Mind, PsyStand, Mirari

- Lead end-to-end product design across the Pink Elephant ecosystem, covering mental health, education, and provider discovery products.
- Built States of Mind from 0→1 and continue to develop the product, defining its structure, user journeys, interface logic, and scalable design patterns.
- Design provider discovery, verification, onboarding, education, and assessment flows to make complex mental health products clearer, more trustworthy, and easier to use.
- Redesigned acquisition funnels and quiz experiences, increasing qualified lead conversion by 16%.
- Improved internal provider verification workflows, reducing operational cycle time from 7 days to 2 days.
- Use AI tools for concept development, visual exploration, image generation, rapid prototyping, and early validation of design directions before production.

Product Designer

X Labs

Feb 2024 – Dec 2024 | Minsk, Belarus

Project: JGGL

- Designed AI- and ML-driven web and mobile product experiences focused on human functional state analysis and behavioral insights.
- Conducted user interviews, usability testing, competitor research, and data analysis to identify user needs, friction points, and product opportunities.
- Turned research findings and analytics into product improvements, helping the team prioritize design decisions with higher business impact.
- Worked closely with product managers, analysts, and engineers across discovery, validation, and delivery.
- Contributed to feature planning and backlog prioritization, helping improve product development speed and user retention.

-

Product Designer

QR Charge

Aug 2023 – Dec 2024 | Remote

- Designed UX/UI for a mobile app and website for a power bank rental service operating across European markets.
 - Improved core user flows for scanning, renting, returning devices, wallet interactions, and error states.
 - Updated the design system and UI kit to improve interface consistency, accessibility, and scalability.
 - Created product and marketing visuals to support user acquisition, brand recognition, and product communication.
-

UX/UI Design Lecturer

BELHARD Academy

Jun 2023 – Jan 2025 | Part-time

- Adapted and improved UX/UI course materials to reflect current product design practices.
 - Mentored beginner designers through practical assignments, portfolio tasks, and structured design feedback.
 - Created project-based learning scenarios to help students understand real product design workflows.
-

UX/UI Designer

Duck.design

Sep 2022 – Mar 2023 | Remote

- Designed web and mobile interfaces for international clients across community, SaaS, and digital platform products.
 - Improved UX for the Korean platform Momoboard by simplifying navigation and adapting flows to local user expectations.
 - Redesigned information architecture and content hierarchy for products such as Conduit and Clevmate, improving usability and engagement.
 - Used competitor research, client analytics, and UX audits to create clearer and more scalable interface solutions.
-

UX/UI Designer

SENLA

Aug 2020 – Nov 2021 | Minsk, Belarus

- Designed UX/UI solutions for enterprise and insurance products, including dashboards and workflow-based internal tools.
 - Simplified complex data-heavy screens, map interactions, and supervisor workflows to improve operational efficiency.
 - Conducted UX analysis to identify navigation and usability issues and translate them into clearer interface solutions.
 - Collaborated with developers to ensure accurate implementation and smooth design handoff.
-

- Delivered UX/UI solutions for startups and small businesses across web and mobile products.
 - Led full design cycles from research and user flows to wireframes, high-fidelity UI, and developer handoff.
 - Designed interfaces across multiple industries, including fintech, e-commerce, and data-driven platforms.
-

CORE SKILLS

Product & UX Design

Product Design, UX/UI Design, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design.

Key Industries

Mental Health, Healthcare, AI/ML, Fintech, Web3, SaaS, Consumer Platforms, Digital Education.

Research & Validation

User Research, Competitor Research, Usability Testing, Data Analysis, Hypothesis Testing, User Feedback Analysis.

Systems & Delivery

Design Systems, UI Kits, Component Libraries, Accessibility, Responsive Design, Developer Handoff.

Tools

Figma, FigJam, Webflow, Framer, Claude, Zeplin, Slack, Jira, Confluence, Adobe Photoshop, Adobe Illustrator.

Languages

Russian — Native, English — B2 / Professional Working, German — Beginner.

EDUCATION

Graphic Design

Grodno College of Art

2011 – 2014

Additional training

UX/UI, Product Design, Design Systems
